Healthwatch Portsmouth Board Discussion

- Portsmouth Clinical Commissioning Group health service scenarios
 - Long Term Conditions
 - Frailty
 - Occasional Same Day Care
 - Mental Health

Healthwatch Portsmouth Board Discussion

Key themes from Development Board meeting in March to review the Clinical Commissioning Group's health service scenarios:

- In general can see the idea behind the new services
- Cost of staffing to properly support the new services > budget?
- Local of the Long Term Condition Hubs will probably need to be in GP surgeries but how with the teams be housed?
- Training for previously hospital based staff to work in the community
- Input from the voluntary sector - specialised or generic

Healthwatch Portsmouth

- Use of technology and home adaptations to support new services?
- IT systems across teams in new services?
- Wider determinants of health need to be borne in mind when preventing ill health rather
- For same day care how will more appointments be available across the city from pooled teams of clinicians?
- Availability of mental health to staff for community based teams to provide a 'care plan approach' service is unlikely to provide care close to home
